In line with the Society’s mission to develop and disseminate psychological knowledge, our international peer-reviewed journals offer the latest original research in psychology to academics, researchers, practitioners and students. All are available in both print and online formats.

The journals are highly cited by the psychology community (according to the 2005 Journal Citation Reports®) and are regarded as a prestigious vehicle in which to publish research material.

- High impact factors
- Immediate online access available 24 hours a day
- FastTrack articles – all articles are available online within 2 weeks of acceptance allowing key research to be accessible straightaway
- Free access to both current and back issues from 1999–2006
- RSS feeds
- COUNTER-compliant user statistics for libraries
- High visibility with all articles indexed by PsycInfo, Scholar Google, Scopus and other leading databases
- Active reference linking
- Special issues and sections

Our Journals list includes:

- British Journal of Psychology
- British Journal of Clinical Psychology
- British Journal of Health Psychology
- British Journal of Developmental Psychology
- British Journal of Educational Psychology
- British Journal of Mathematical and Statistical Psychology
- British Journal of Social Psychology
- Journal of Occupational and Organizational Psychology
- Psychology and Psychotherapy: Theory, Research and Practice
- Legal and Criminological Psychology

All journal articles can be viewed online @ www.ingentaconnect.com/content/bpsoc

See www.bpsjournals.co.uk for further details
The Journal of Neuropsychology is a new international peer-reviewed journal published by The British Psychological Society. Due to be launched in March 2007, it will publish original contributions to scientific and clinical knowledge in the field of neuropsychology.

**Aim and Scope**

The Journal of Neuropsychology publishes theory-driven patient studies. The central brief is to learn more from patients with brain dysfunction to gain a better understanding of brain-behaviour relationships and to help future patients. Topics reflect the multidisciplinary character of the field and include clinical and research studies with neuropsychological and psychiatric populations in all age groups using a variety of research methods ranging from test construction and normative data, behavioural or pharmacological treatment regimes, to cognitive experimentation and neuroimaging.

**Articles from the first issue include:**

- **Directional apraxia:** A unitary account of mirror writing following brain injury or as found in normal young children - Sergio Della Sala and Roderico Cutelli, Italy.

- **Elevated emotional reactivity in affective but not cognitive components of theory of mind:** A psychophysiological study - Elke Kalten, Fabian Gratzenhorst, Matthias Brand, Josef Kessler, Rudiger Lilker and Hans J Markowitsch, Germany.

**Call for Papers!**

Authors – why not submit your paper to us?

The Journal of Neuropsychology is committed to a fast and efficient turnaround of papers, aiming to complete the review process in under two months. Submissions are processed via a web-based system and reviewers are required to complete their referee report within 28 days.

Submit online at: http://jnp.edmgr.com

**Manuscript requirements are available at:** http://www.bps.org.uk/publications/journals/jnp/notes-for-contributors.cfm

**Further forthcoming special issues:**

- **Facial Processing**
  - Guest edited by Edward de Haan and Russell Bauer.
  - In 1947, sixty years ago, Joachim Bodamer published his seminal paper in which he coined the term ‘Prosopagnosia’ for a selective deficit in the recognition of familiar faces. This special issue, edited by Russell Bauer and Edward de Haan, aims to take stock of the field by bringing together experimental work and reviews on a number of recurrent issues, such as ‘are faces special’, which features are used to recognize faces, and ‘are face perception skills genetically determined.’
